ATHLON

OPTICS

# YOUR PRIZE IN OPTICS

ATHLON is a proud US sports optics product company devoted to designing and delivering superior quality optics products and outdoor accessories at a competitive price to our consumers via our distribution and retail channels. Athlon has strong engineering design capabilities, strategic alliances with guality manufacturers and a streamlined fully integrated supply chain. These advantages enable us to bring the latest cutting edge technologies and cut out the extra layers of the traditional supply chain. With these advantages we are able to deliver goods and products to individual consumers' hands with great cost savings.

Our obsession with product quality and superior customer service for hunters, recreational shooters, and outdoor enthusiasts drives our business. The business model on which we founded Athlon allows us to deliver high quality optics at extremely competitive prices. Our goal from day one is to pass those savings to you, the outdoor enthusiast.

# LIFETIME WARRANTY

Your Athlon product is not only warranted to be free of defects in materials and workmanship for the lifetime of the product. Athlon will also repair or replace the product at no charge to you if you damage it through normal use. No receipt needed, no registration required. This is a commitment that Athlon Optics will be the best product you can buy for your money. This warranty does not cover damages caused by deliberate damage, misuse, theft or maintenance provided by someone other than the Athlon Authorized Service Department.

Just when you thought we couldn't improve the Ares BTR, well we did! The Ares ETR First Focal Plane scope is loaded with features that will allow you to take your long range shooting to another level. Featuring a completely revamped turret system, the Ares ETR has a locking Windage turret along with a true zero stop on the elevation turret to make sure your turrets and shots are right on every time. Extra Low dispersion lenses allow for the sharpest and best color image possible. Constructed with an 34mm tube, this riflescope can withstand even the harshest of elements.

# **KEY FEATURES**

Built off the success of the 1st generation Ares BTR, the GEN2 is still a top-tier riflescope, without the price tag. The Ares BTR GEN2 acquires a new stainless steel turret design, just like the Midas TAC and Ares ETR lines. The new turret design features sharper, more tactile clicks. Featuring HD glass, a new optical system provides an even brighter and clearer image throughout the magnification range. A one-piece, precision machined aircraft grade aluminum scope body, precision zero stop, and impeccable tracking will deliver precise, accurate results in any field.

Locking turrets aren't just for hunting. The Helos BTR has something for long range shooters and service rifle competitors as well! A one piece aircraft grade aluminum tube housing Advanced Fully Multi-Coated lenses gives you a sharp, robust riflescope. The long range models have crisp locking turrets. The 1-4.5x24 service rifle scope has a 1 revolution limiter and zero stop, ensuring you never lose track of your initial zero.

# ARGOS BTR GEN2 RIFLESCOPES

A precision long range optic with features normally found on high-end riflescopes. The Argos BTR GEN2 is designed for precision shooting on a budget. Advanced Fully Multi-Coated Optics deliver a clear bright image in low-light environments. The GEN2 now features Athlon's Precision Zero Stop System, for a quick-hard stop when returning to zero. It also features turrets with sharper, more tactile clicks more tactile clicks.

If you ask any hunter they'll tell you they have probably filled more tags in the low-light hours than any other time. The Talos scope with Fully Multi-Coated lenses for clarity and brightness in low light, you'll be able to add precious minutes to every hunting day that you've worked so hard for. These scopes, with their 4X magnification range, will give you great versatility whether you are hunting whitetails in the dense forest or prairie dogs in the wide open ranges. With its one-piece tube design, the Talos line includes an assortment of specialty scopes for big-game, varmint, MSR's, 22 rimfire, slug, black powder and turkey hunting.

Increasing your success while hunting doesn't necessarily have to decrease your savings account. The perfect example of that is the Neos series. This is the perfect scope for those who want quality and features all while staying on budget. The Neos has an impressive list of features which are designed and built to endure. It has a one piece aluminum tube. The lenses are Fully Multi Coated. Some of the models even have the latest side parallax focus technology. What about the cost? Let's just say the scope isn't the only thing that looks good, with ruggedness and precision we are proud of!

# CRONUS TACTICAL UHD SPOTTING SCOPES

Whether you are a long range shooter, hunter or part of a sniper team, the new Cronus Tactical 7-42x60 Spotting Scope with our ranging reticle will make your job a breeze. The TSSR FFP MIL reticle is great for both range estimation and tactical cooperation with the shooter. Feature rich from tip to tip, this is an optic that will not be left behind. The unique design of a high riser mount will allow you to mount your Athlon Laser Rangefinders on the top and tilt it to co-witness with your spotting scope.

# **CRONUS UHD** SPOTTING SCOPES

You've just adjusted focus on what had once been only an elusive lifelong quest- an Alaskan Bighorn or a Red-Throated Pipit. We developed this "Award Winning" Cronus Spotting Scope to give you one of world's best optics with brighter and clearer edge-to-edge detail. So whether you're hunting above timberline in Alaska or birding at sea level at Cape May, you will know every detail of your trophy before you take the shot or mark it off your life list. The Cronus product line has just about every feature you would put in a scope to make it the best you can get in its class.

We designed the Cronus with the Apochromatic system to give your images greater contrast, sharpness and color definition. We included ED Glass that delivers clearer and sharper image to your eyes. Our state of the art ESP (Enhance Spectral Prism) dielectric lens coating that reflects 99% of the light through the prism assembly. Other design enhancements include BaK-4 prisms and our "Advanced Fully Multi-Coated" lenses deliver flawless color fidelity, ultra-crisp images and optimum light transmission. Finally we topped off with our XPL coating that gives you extra protection on the exterior lenses from dirt, oil and scratches.

# ARES UHD/ ARES G2 UHD SPOTTING SCOPES

The Ares family of spotting scopes were designed with advanced optical quality and ease of use in mind, so when you are trying to collect that trophy of a lifetime, your spotting scope is one thing you don't have to worry about. We made that task as easy as optically possible with bright, razor-sharp imagery and a rugged, weatherproof design that's ready for any condition. These spotting scopes have ED glass lenses for color resolution and contrast. They also have our AFMC (Advanced Fully Multi-Coated Lenses) and feature BaK4 prisms with the new ESP Dielectric Coating. They bring super-premium clarity and brightness within the reach of most avid enthusiasts. The tough chassis is fog proof and waterproof and filled with Argon gas to prevent internal fogging and for better thermal stability.

# ARGOS HD Spotting scopes

Whether helping your buddy sight in his rifle, or spotting for others at a PRS match, spotting scopes are becoming a necessary item on everyone's equipment list. A lightweight option for hunting and birding, the composite chassis on the Argos spotting scope has rubber armor for an extra layer of protection. No matter what position you find yourself in, the spotting scope can be orientated to a comfortable position using the rotating lock ring. Advanced Fully Multi-coated lenses and nitrogen purging provide great light transmission and weather-proofing.

 $(\begin{subarray}{c} \begin{subarray}{c} \end{subarray} \end{sub$ 

The speed and versatility of a Red Dot goes unmatched in close range engagements. Whether you are running an AR or PCC in competition, hunting, or running a Red Dot on an optics ready pistol, the TSR series of Red Dots has you covered. With 50,000 hours of battery life and motion sensor activation, the TSR series is always ready.

The TSR1 features a 3MOA red dot, quickly allowing the pistol shooter to acquire the red dot while focusing on the targets The TSR2 and TSR3 both have 2MOA red dots. This smaller red dot minimizes target obstruction, aiding in precision shooting.

 $(\mathcal{A})$ 

When you want quick target acquisition at both short and medium ranges you need additional magnification. Athlon prism scopes give you great versatility. This optic is equipped with a prism for a crisp, vivid image. The prism-based de-sign allows for a more compact scope without sacrificing optical quality. With this longer focal length it can achieve the magnification needed to reach out and touch targets at longer ranges. Athlon prism scopes are nitrogen-filled, fog proof and shock proof, allowing for reliable use in a wide range of environments. Featuring a selectable red/green illuminated reticle with multiple intensity levels to match your specific conditions. The reticles are etched directly on the glass to make sure you have consistent point-of-aim at all times. Whether you have the illumination on or off, the reticle is always visible.

(A)

TSP4

30 mm 3.9

Many times when in the field or during competitions you need to transition between no magnification for speed in close-range combat and magnification for precision shooting as situation dictates.

The Athlon 3 or 5 power magnifier mounts behind a traditional red-dot sight to provide magnification when needed. The mount has the ability to swing out of the way when not in use, but can quickly be placed behind the Red Dot to increase the magnification for longer mid-range shots. Rugged construction. Multi-coated lenses and 30mm tube for excellent light transmission. Nitrogen purged, shockproof, waterproof, and fogproof.

1200Y

# **MIDAS 1200Y** RANGEFINDERS

The Athlon Optics Midas 1200y Laser Rangefinder is in a class of its own. The Midas 1200 ranges quick and accurate from 5 to 1200 yards. Whether shooting from steep elevations to flat ground, the Midas is capable of both with our angle compensation and line of sight modes.

The scan mode can quickly scan different objects for distances on the fly. Bright display settings with Fully Multi-Coated lenses deliver maximum light transmission while being housed in durable non slip rubber armor.

The Midas can display readings in either yards or meters depending on your hunting or shooting needs. Finally the Midas comes with a protective carrying case as well as a protective wrap that allows you to use the laser while protecting it at the same time.

# **THREE RANGING MODES TO CHOOSE FROM**

Incline Angle (T) mode displays the incline angle of your position to the target.

Horizontal Distance (H) mode displays the angle compensated distance to the target. This is the primary mode used by most hunters (Both bow and rifle).

Vertical Distance (V) mode displays the vertical distance of your position to the target.

Scan Mode displays distance readings quickly as you pan across a target, landscape or a moving animal

ATSR2 SFP IR MOA Designed around the .223/5.56mm using a 69 grain Sierra Match King and a 200 yard zero. The open center design allows shooters to engage 12-18" targets out to 600 yards by quickly bracketing the target. Subtension holds for 300, 400, 500, and 600 yards are calibrated to compensate for 0, 5, and 10 MPH winds. The 3-post cross hair design guickly draws the shooters attention to the illuminated center dot. Perfect for 3-aun competitions or the hunter looking for short to midrange engagement when seconds matter.

APRS1 FFP IR MIL reticle is designed for precision rifle series competition and any other long range shooting applications with accurate ranging capability. It can help you quickly determine distance, holdover positions, windage correction and leads for a moving target. The unique design of fine .2 mil hash mark increments from center to 6 mils to both left and right helps the shooter set a guick windage holdover position after he or she dials in elevation on their targets. The floating 0.04 center dot draws a shooter's vision right on target enabling him or her to engage a target at a blink of an eve.

APLR FFP IR MOA reticle has a large illumi-

nated center with 1 moa incremental hash

marks and drop lines in 5 moa incremental

on vertical direction down to 50 moa, which

help you quickly lock in your target and set

holdover positions. The illuminated portion

has a 2 moa center cross and 40 moa cross

lines (50 moa on lower vertical line). The

drop lines have smaller dots with 1 moa

in between and bigger dots at each 5 moa

interval. The illuminated reticle provides ex-

cellent low light visibility and accurate ele-

vation holdovers all the way up to 50 moa.

,<u>D1</u> B1 , B2 , B3 B4

ATSR2 SFP IR MOA is a long awaited addition for those who prefer MOA-based reticles. The floating dot, popular with precision shooters, is now available in the Ares BTR line. At .2 MOA, this dot is roughly the size of a bullet hole at 100 yards, giving you the possibly of shooting your tightest group. Fine tuning your zero is a breeze with 1 MOA elevation and windage hash marks, saving the shooter both time and bullets when estimating corrections.

APLR3 FFP IR MIL reticle can help you quickly determine distance, holdover positions, windage correction and leads for a moving target. The unique design of fine .2 mil hash mark increments from center all the way to four directions helps the shooter set a precise holdover position for their targets within a blink of an eve. The illuminated fine reticle provides excellent low light visibility and windage holdovers on the bullet droplines all the way up to 10 mils with .2 mil marks increments in between.

APRS FFP IR MIL reticle is perfect for fast corrections on windy days. Designed to help shooters determine proper windage and elevation corrections quickly, without being too busy. A precise .05 MIL floating dot in the center of the reticle reduces target obstruction. With elevation hash marks of .2 MILS extending from the center to 1 MIL, and windage hash marks of .2 MIL increments extending out 6 MILS from center. This configuration is ideal for fast corrections on near misses if you've misjudged the wind or target distance.

**MIDAS TAC HD** 

APLR4 FFP MOA reticle is a blend of precision marksman and long-range hunter. The open center design eliminates target obstruction by utilizing a .2 MOA diameter dot. 1 MOA hashmark increments provide fast holdovers up to 40 MOA, compensating for both windage and elevation.

.12 .3 2 .6 1.5 2 .5 1 5 10 2 .2 .3

APRS3 FFP MIL reticle is a dual use design. Allowing the shooter to accurately range and compensate windage and elevation holdovers should they prefer not to make turret elevation adjustments between shots. Quick windage or lead holdovers is possible due to the .2 Mil increment hash marks. This open-center reticle features a .05 Mil floating dot, quickly drawing the shooters attention to the center.

# **MIDAS HMR HD** AHMR SFP IR MOA

AHMR SFP IR MOA reticle has an illuminated 20 moa center with a 2 moa center cross and 2 moa incremental hash marks which provide a unique two layer visual reference for a shooter to locate and get dead on the target within a blink of an eye. The illuminated reticle provides excellent low light visibility. The unique design of the markings with 2 & 4 moa and 6 & 8 moa locating at the opposite side of the lines gives you a clear reading of the markings with no confusions.

APRS2 FFP MIL reticle is designed for precision rifle series competition and any other long range shooting applications with accurate ranging capability. It can help you quickly determine distance, holdover positions and windage corrections. The unique design of fine .2 mil hash mark increments from center to 6 mils to both left and right helps the shooter set a quick windage holdover position after he or she dialed in elevation on their targets. The floating 0.05 (0.06)center dot draws a shooter's vision right on target enabling him or her to engage a target at a blink of an eye.

# **MIDAS HMR HD** BDC 600A IR

BDC 600A IR reticle can be used effectively with a variety of firearms giving your accurate ranges and reference marks which can be used to compensate for bullet drift in windy conditions or range distances. The user can sight in at 100 yards on any magnification setting, but for the ballistic reticle feature to function properly, the scope's magnification must be set to the correct power as follows: 2.5-15x50 (15x power)

ATSR16 SFP IR MOA reticle has a large illuminated center and 2 moa incremental hash marks, which help you quickly lock in your target and set holdover positions. The illuminated center with a 20 moa diameter circle in the middle has a 2 moa center cross and 2 moa incremental hash marks extended to 30 moa at each direction on both vertical and horizontal lines. The cross lines, middle circle, and center cross provide a unique three layer visual reference for a shooter to locate the target and set dead on the center cross within a blink of an eve.

# AHMR SFP IR MOA reticle has an illuminated 20 moa center with a 2 moa center cross and 2 moa incremental hash marks which provide a unique two layer visual reference for a shooter to locate and get dead on the target within a blink of an eye. The illuminated reticle provides excellent low light visibility. The unique design of the markings with 2 & 4 moa and 6 & 8 moa locating at the opposite side of the lines gives you a clear reading of the markings with no confusion.

# **MIDAS BTR GEN2 HD** ATSR4 SFP IR MOA

ATSR4 SFP IR MOA reticle is designed for quick target acquisition, speed, and precision shooting in short to mid-range environments. Ideal for CQC and 3-gun competition, this reticle is calibrated for a 68 grain Hornady and 69 grain Sierra cartridges, and suitable for any 5.56 Nato/.223 caliber rifle using a 200 yard zero. The 25 MOA horizontal and lower 1/3rd crosshairs quickly draw the shooters eye to the illuminated 19 MOA horseshoe and 1.4 MOA center dot. With a 200 yard zero, the precise .5 MOA elevation holds compensate for 300, 400, 500, and 600 yards and 0, 5 and 10 MPH winds.

**ARGOS BTR GEN2** 

**APLR2 FFP IR MOA** 

APMR FFP IR MIL reticle is designed to maximize your performance on long and mid-distance shooting with illuminated center cross and 0.5 mil hash mark, the APMR IR MIL reticle can help you quickly lock in your target and set holdover positions and leads for a moving target. The illuminated 18 mil span cross lines with 0.5 mil hash marks and 0.2 mil hash marks from 7 mil to 9 mil on three directions provide finer details that helps the shooter quickly locate the target and find a holdover position within higher level of precision and confidence.

APLR2 FFP IR MOA reticle has a large illuminated center with 1 moa hash mark increments and drop lines in 5 moa increment on vertical direction down to 40 moa, both of which help you quickly lock in your target and set holdover positions. The illuminated portion has a 2 moa span center cross with illuminated cross line extends to 40 moa on both vertical and horizontal direction. The unique design of having droplines going down to 40 moa with 5 moa between each drop line and 1

# APMR FFP IR MIL reticle is designed to maximize your performance on long and mid-distance shooting with illuminated center cross and 0.5 mil hash mark, the APMR IR MIL reticle can help you quickly lock in your target and set holdover positions and leads for a moving target. The illuminated 18 mil span cross lines with 0.5 mil hash marks and 0.2 mil hash

marks from 7 mil to 9 mil on three direc-

tions provide finer details that helps the

shooter quickly locate the target and find

a holdover position within higher level of

ATSR5 SFP IR MOA reticle is calibrated for

a 68 grain Hornady and 69 grain Sierra car-

tridges, and suitable for any 5.56 Nato/.223

caliber rifle using a 200 yard zero. The 25

MOA horizontal and lower 1/3rd cross-

hairs quickly draw the shooters eye to the

illuminated 19 MOA horseshoe and 1.4

MOA center dot. The 19 MOA horseshoe is

designed to bracket a silhouette target at

100 yards. With a 200 yard zero, the pre-

cise .5 MOA elevation holds compensate

for 300, 400, 500, and 600 yards and 0, 5,

and 10 MPH winds.

precision and confidence.

ARGOS BTR GEN2

BLR SFP MOA

# **TALOS BTR APLR2 FFP IR MIL**

APLR2 FFP IR MIL reticle is designed to maximize your performance on precision long and mid range shooting with accurate ranging capability. It will help you quickly determine distance, holdover positions, windage correction and leads for a moving target. The unique design of fine .2 mil hach mark, having .2 and .4 on one side of eather horizontal or vertical line and .6 and .8 on another side, helps the shooter quickly locate a holdover position with .2 mil increments within a blink of an eye. The illuminated fine reticle provides excellent low light visibility and windadge holdovers on the bullet droplines all the way up to 9 mils with .2 mil marks increments between.

BLR SFP MOA reticle is designed to max-

imize your performance for both Bench

Rest and F-Class shooting applications.

Fine line thickness of the reticle (0.016

MOA) allows for pinpoint precision at ex-

treme ranges, especially on smaller tar-

gets. A non-illuminated floating center dot

(0.09 MOA thick) provides a precise aiming

point. This reticle combined with the Ar-

gos BTR Rifle Scope provides the perfect

solution.

C5

# TALOS ATMR1 SFP IR MIL

ATMR1 SFP IR MIL reticle is perfect for shooting at the range or competing in a competitions. The customized Mil hash mark design helps to eliminate any guesswork with holdover and windage adjustments. The illuminated reticle is great for low light situations when you need to count on a good, accurate shot.

Center X reticle is a perfect choice for shooters wishing to have a clear field of view with a more traditional crosshair. The Center X reticle allows shooters to guickly view their target while maintaining one distinct aiming point on their reticle. The heavy posts stand out nicely against cover and in twilight conditions, pointing boldly to the intersection.

Mil Dot reticle is one of the most accurate, versatile means of estimating ranges using a manual optical device. The Mil Dot allows the user to do range estimations, holdover and wind drift compensation as well as for precise leads for moving targets.

# ACCESSORIES **BINOCULAR HARNESS**

The Athlon Optics Binocular Harness is the most functional, versatile binocular system in the market. It holds your binoculars tight to your chest, and is designed for guiet, one-handed use. With the multiple shoulder and neck adjustments, this allows the binocular harness to hold close to your chest and prevent sag and bounce when crawling or running. The harness allows for a full range of motion while the binoculars are in use

from a vendor broken.

In less than 10 days I had a new scope in my hand. My hunt was dependent on getting a scope back, in a certain time, and Athlon went out of their way to make sure that happened. Not only is it a fantastic scope with a great warranty but their customer service is truly out of this world!

for life!

- Michael Stripling

I want to thank Athlon, their great team in the warranty department, and especially Drake who returned all my calls and kept me informed. I sent them a scope I had received

This experience makes it an easy choice for my next rifle, I am an Athlon Optics customer

This summer while at the range getting ready for a PRS shoot my rifle tipped over while on the bipod. It hit hard on the windage turret. I called Athlon and was told to return it and it would be checked to make sure it was ok. 1 week after sending the scope in a new arrived at my door. This is service that was unexpected. I have since purchased another Athlon scope.

Thank you for the great customer service Athlon!!

- Shon Berry

Athlon Optics is awesome company that stands behind their product. I have to say after my rifle slid off the sandbags at the range and hit the concrete Athlon was great about getting me back up and running.

Lifetime warranty u can't beat it. I wish I had one on all my rifles.

Lynn Atkinson

I purchased a set of Athlon Argos binoculars in 2017 from 5-H Designs. They were great! Only problem is my 10 year old Grandson dropped them about 8-10 feet on the eye cups, rendering both cups useless. This was no fault of Athlon but I thought I would check with them to get them fixed at my expense.

When I contacted them and talked to Drake he told me to send them in. I did and in about a week or so, I had a brand new pair at my house!! I can't say enough about Athlon and the way they stand behind their products. That was not a product failure, that was an accident that really shouldn't have been covered.

I am going to purchase a new rifle scope soon and it will be an Athlon! Thanks guys! Great products and Great warranty.

-Tim Kingcade
