THE ATHLON® AHMC SFP IR MOA RETICLE

AHMC SFP IR MOA is a traditional hunting style reticle with an illuminated center-dot. The outside crosshair is bold, and prominently stands out against backgrounds that are tough to differentiate. It tapers down to a fine crosshair with a floating center-dot to reduce target obstruction, while drawing your eye to the center of the reticle.

For 3-9x50 reticle subtension is valid at 9x.

Application: Hunting and Tactical
