CRONUS ATS PRO THERMAL SCOPE RETICLES

Cronus ATS PRO series thermal scopes allow users to save up to 10 reticle profiles, choose from 10 different reticle types (5 in MOA and 5 in MIL), 6 reticle colors (black, white, yellow, green, blue and red), and 10 reticle brightness levels. These settings can be accessed through the scope's main menu or the Athlon Ballistics App.

When the scope is powered on, long press the M button to open the main menu and access the Reticle Settings. For more detailed menu operation instructions, please refer to the Quick User Guide or User Manual available on the product's webpage.

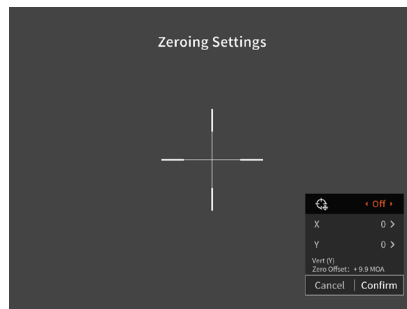

When the Athlon Ballistics APP is connected to the scope, go to the general settings to access the reticle settings.

Profile Configuration: Letters A to J are assigned to 10 different profiles. The zeroing distance, zeroing location, reticle type, reticle color and reticle brightness are saved for each profile.

Zero Setting: You can choose from 50, 100, 200, 300, or 500 yards or meters in the shortcut menu. Use the One Shot Zeroing feature in the main menu to sight in. After setting the zero, use the shortcut menu to select the preset zero distance under each profile. For detailed One Shot Zeroing instructions, please refer to the Quick User Guide or User Manual available on the product's webpage.
