

AHMC1 Fiber Dot IR

Ares HLR Rifle Scope

SECOND FOCAL PLANE

RETICLE MANUAL

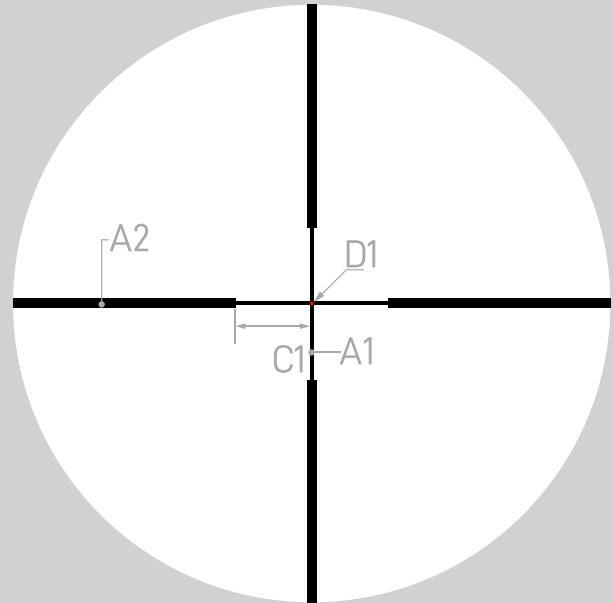

THE ATHLON® AHMC1 FIBER DOT IR MOA RETICLE

Athlon's AHMC1 Fiber Dot IR reticle is a traditional hunting style reticle with an illuminated fiber optic center-dot, providing a sharper and more precise dot. The outside crosshair is bold, and prominently stands out against backgrounds that are tough to differentiate. It steps down to a fine crosshair with a center-dot to reduce target obstruction, while drawing your eye to the center of the reticle.

For 2.5-15x42 reticle subtension is valid at 15x.

For 4-24x50 reticle subtension is valid at 16x.

Application: Hunting

SUBTENSIONS IN MOA - 2.5-15x42

A1	A2	C1	D1
0.26	1.04	10.42	0.2

SUBTENSIONS IN MOA - 4-24x50
